Time gaps between categories: Allow at least 6 empty start times (3 minutes using 30-second gaps between start times; 6 minutes if one-minute start intervals) between each TT Cup category when assembling the start list based on preregistrations. Allow 10 empty start times after last junior category and after Men Category 3.

Order of preregistered riders within each category: The five (5) highest ranked riders within each Oregon TT Cup category should be the last 5 riders to start in that category (assuming they pre-register to race). The series leader is the last rider to start; the rider in second place starts second to last; the rider in third place starts third to last; etc. The TT Cup requires a minimum sorting of the top 5 category leaders though we suggest going deeper to provide more synergy to the Series. The latest series schedule and current standings are posted at http://obra.org/oregon_tt_cup.

Adding riders on race day: Riders who register last should be the first to start in their category. They should be added to the start list in the empty start times BEFORE the first

preregistered rider. Riders should race only with the category they are racing in; they should not be given start times at a significantly different time of day.

Sample start list: A portion of a sample start list might look like this:

Eddy Category Specific Rules:

Riders in this class will compete without: aero bars or extensions, disc wheels, fairings, aero helmets (any helmet specifically built as an aero helmet and any helmet that has been modified to approximate a helmet specifically built as a TT helmet is not allowed), skinsuits, or wheels with rims greater than 40mm in depth. Bicycles which may have aerodynamic shapes but are designated to be sold as road bicycles (and are not user modified time trial bicycles) ARE allowed. These special rules must be printed on event flier and be made available to Officials the day of the event.
